Ikea has erected a large solar panel installation on the rooftop of its Etobicoke store. — Photo by Colin McConnell / Toronto Star

The Toronto Star's Business Reporter, John Spears keep us up to date with the latest news...

Ikea generates cash from roof tops

Retailers have a new metric to work with beyond sales per square foot of floor area.

Now, some are plotting kilowatts per square foot of roof area. Ikea has jumped into electricity generation in a big way, unveiling the first of three big solar-powered electricity generation installations.

The company is installing 3,790 solar panels on the roofs of stores in North York, Etobicoke and Vaughan.

Put together, the panels will cover nearly 4,800 square metres, or nearly 60 per cent of a Canadian football field.

They'll generate about 960,000 kilowatt hours of power annually, Ikea figures – or enough to supply 100 homes.

And with the company getting 71.3 cents a kilowatt hour for a power it feeds into the grid, Ikea vice president Doug Pass said the panels pay their way as a business proposition.

The price, paid under Ontario's feed-in tariff program, is more than 10 times the average wholesale energy price on the province's energy market.

Bi-weekly microFIT Program reports

Ongoing statistics on the microFIT Program from the OPA - MicroFIT website: <http://microfit.powerauthority.on.ca/Program-updates/Bi-weekly-microFIT-Program-reports.php>

Note: 99 percent of microFIT Program applications are for solar PV projects.

November 9th, 2010

Current Status	No. of applications	Total MW
Total applications	22,108	202
Conditional offers	15,716	144
Contracts executed	1,825	14

COMPARED to the September 13, 2010 Report

Current Status	No. of applications	Total MW
Total applications	19,891	182
Conditional offers	10,967	98
Contracts executed	894	6

The OPA has developed a **Conservation Kids' Corner**, where kid's learn through games, quizzes, and videos, the facts about electricity and how to use energy wisely. Getting Kid's "Plugged In" to how

they can help, by learning ways of conserving, will make the difference to our future. Play now at:
